Description

The error message displayed when password does not contain special characters does not provide sufficient information to users about which special characters are required.

Steps to Reproduce:

- 1. Open the Registration page
- 2. Fill in Password field with password without special characters: Password123
- 3. Try to submit the form
- 4. Observe the error message that appears

Expected Result:

Specific error message, example: "Password must contain at least 1 special character (!@#\$\$%^&*)"

Actual Result:

Error message does not explain which special characters are required, users don't understand password requirements.

Impact:

Users don't understand password requirements and must try multiple times through trial and error.
