Description

System displays error message about "empty file attachment" even though user did not intend to upload a file, causing confusion and preventing message sending.

Steps to Reproduce:

1. Open the Contact page
2. Fill in the form with valid data (name, email, subject, message)
3. Don't select any files to attach
4. Click the Send button
5. Observe the error message that appears

Expected Result:

- If attachment field is optional, there should be no error message
- Or attachment field must be clearly marked as "Optional" or "Required"
- Message only appears if user actually selected a file that turns out to be empty

Actual Result:

Error message about empty file attachment appears even though user did not intend to upload any file.

Impact:

Users are confused and cannot send messages due to irrelevant error.
